PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience designing and delivering secure, scalable web applications and microservices using Angular, ASP.NET/C#, and Azure. Proven track record modernizing legacy systems, architecting high-throughput REST APIs, and implementing enterprise security controls (Azure Entra ID, MFA, SSO, API-Gateway rate limiting). Skilled in full-stack development, CI/CD (Azure Pipelines), containerization (Docker, Kubernetes), and cross-functional delivery.

TECHNICAL SKILLS

- Languages & Frameworks: C#, TypeScript, JavaScript, Angular (v20), Blazor, ASP.NET, .NET MAUI, jQuery, Ajax, Node.js
- Data & APIs: MSSQL, MongoDB, LINQ, Entity Framework, ADO.NET, REST API design
- Cloud & DevOps: Azure, Docker, Kubernetes, Azure Pipelines (CI/CD), Azure Service Bus
- Security: Azure Entra ID, Multi-Factor Authentication (MFA), SSO, API-Gateway rate limiting, DDoS mitigation
- Other: PowerShell, Bash, XML, XAML, JSON, YAML, System Design, Design Patterns, Microsoft Agent Framework
- Certifications: Microsoft AZ-900; TCS AI Path (L1, L2, L3)

WORK EXPERIENCE

Senior Software Engineer — Clover Infotech, Andheri

Aug 2026 – Present

- Serve as sole point of contact for the complete Clover corporate website, leading its migration from a legacy WebForms architecture to a microservices-based platform.
- Preserved existing UI/UX while re-engineering backend functionality, minimizing user disruption during migration.
- Built the UI in Angular 20 and backend services in ASP.NET/C# 10 with SQL Server; implemented CI/CD pipelines using Azure Pipelines.

System Engineer — Tata Consultancy Services, Thane

Mar 2022 – Aug 2025

- Architected high-throughput, secure platforms and engineered scalable REST APIs combining synchronous workflows with asynchronous processing via Azure Service Bus to support distributed microservices and event-driven data streams.
- Strengthened platform security by implementing Azure Entra ID for Multi-Factor Authentication (MFA) and Single Sign-On (SSO).
- Improved infrastructure resilience by deploying API-Gateway rate limiting and enterprise bot protection, reducing credential stuffing, DDoS, and fraudulent traffic.

Sales Engineer — Talin Machinery, Noida

Sept 2021 – Mar 2022

- Achieved monthly sales of ₹13 lakh selling drillers, cutters, and pneumatic machines, consistently meeting assigned revenue targets.
- Recognized for exceptional customer service, contributing to a measurable increase in client retention.

Assistant Engineer — Crane.CO, Satara

Jun 2019 – Jan 2020

- Assisted in developing quality control measures that reduced production errors by 99% (Bell Curve, σ 3), improving product quality and customer satisfaction.
- Contributed to quality assurance initiatives that reduced product defects and enhanced brand reputation.

PROJECTS

- Automation in Disk Increment (2024) — Automated server disk capacity management.
- Server Upgrade Automation (2024) — Automated the end-to-end server upgrade process.

- On-Call Report Automation (2024) — Built automated reporting for on-call operations.
- Full-Stack Workshop System (2025) — Delivered a full-stack website and mobile app for workshop management.
- 2D/3D Game Development (2025) — Built games in Unity, covering both 2D and 3D development.
- C Projects (2026) — Applied systems-level programming in C.

EDUCATION

B.Tech. in Mechanical Engineering — Walchand College of Engineering, Shivaji University (2019)

Diploma in Mechanical Engineering — Government Polytechnic Amravati, Amravati University (2016)
